HIGHFIELD SPORT 560

Gumenjaki ,Hrvaška

Opis

Choose a harmonious form and premium HIGHFIELD inflatables.

The HIGHFIELD Sport 560 dinghy is a combination of irresistible French design, light and very solid aluminum construction, perfect finishing and untouchable performance!

The 560 Sport is an innovative dinghy that takes almost all standards (economy, handling, performance, practicality, design, etc.) to a whole new level. The modernly designed dinghy brings top new solutions in combination with a solid and light aluminum construction and an excellent finish, it is ideal for sports, recreation or rent.

Several benefits it brings are:

– Lightweight and solid aluminum hull construction significantly contributes to lower fuel

consumption

– Modern design allows great convenience and top new solutions.

– Excellent performance thanks to aluminum construction.

– Environmental benefits of recycling.

– Hypalon material (ORCA 828) as one of the highest quality construction materials according to EU standards.

– The vessel is registered until 27.04.2022.

– In sailing, especially in turns and normal maneuvers Highfield 560 Sport behaves well thanks to the moderate angle and depth of the V profile of the hull. This moderation ensures stability at higher gliding speeds when the speed exceeds 30 knots when the tubes stabilize lateral rolling and vibration. The hull softly absorbs smaller waves, which provides a satisfactory dose of safety for less experienced skippers.

TECHNICAL DETAILS:

YAMAHA F130 AETX (85 operating hours)

Water tank 100 L

Fuel Tank 105 L

Roll bar
Console
Seats
Steering wheel
Sundeck
EVA teak
Highfield dry bag
Foot pump
Oars
Repair kit
Anchor
Water separator
Bilge pump
Radar reflector
